1.1 CULTURE CONCEPT

Definitions (1/4)

"By culture we mean all those historically created designs for living, explicit and implicit, rational, irrational, and non-rational, which exist at any given time as potential guides for the behavior of men." (Kluckhohn & Kelly, 1945)

"Learned and shared human patterns or models for living; day-to-day living patterns. These patterns and models pervade all aspects of human social interaction. Culture is mankind's primary adaptive mechanism" (Damen, 1987)

Definitions (2/4)

"Set of shared and enduring meaning, values, and beliefs that characterize national, ethnic, or other groups and orient their behavior" (Mulholland, 1991)

"Culture is the shared knowledge and schemes created by a set of people for perceiving, interpreting, expressing, and responding to the social realities around them" (Lederach, 1995)

Definitions (3/4)

"The collective programming of the mind which distinguishes the members of one group or category from another" (Hofstede, 2011)

"Culture is values, attitudes and meanings that are learnt and shared by members of the community and that influence their way of life." (French, 2015)

Definitions (4/4)

Perhaps the useful one is Kluckhohn's definition:

"Culture is to society what memory is to individuals. It includes what has worked in the experience of a society, so that it was worth transmitting to future generations."

ELEMENTS (COMPONENTS) OF CULTURE

The essence of an element is that it is a replicating entity.

Cultural evolution involves the transmission of these components from generation to generation.

(Triandis, 2011)

LEARNED

Characteristics of Culture (1/4)

Culture is not inborn tendency. It is learned through experience.

SHARED

Every culture is shared by a group of people.

The region we live in, the geographical conditions around us, our country's past, the belief system and values of people, and the heritage we are proud of, constitute our culture.

Characteristics of Culture (2/4)

CONTINUOUS

It is like a stream which is flowing from one generation to another through centuries. "Culture is the memory of human race."

ESSENTIAL

To make us feel a part of the group and to give us the guiding principles of life, culture is essential.

Our cultural values, and our system of beliefs shape our thinking and behavior. The way we carry ourselves in society and who we are as human beings, is highly influenced by the culture we belong to.

Characteristics of Culture (3/4)

CHANGES

Cultural process changes with different speeds from society to society and generation to generation.

Migration and globalization lead to a mixing of cultures. When people from different parts of the world come together, they influence each other's cultures.

\bigvee

Characteristics of Culture (4/4)

TRANSMITTED

Culture is capable of transmitted through language from one generation to the next.

Cultural values are transferred across generations in the form of symbols and stories that make them easier to understand.

GROUP DISCUSSION

? Which definition(s) of culture do you prefer to explain the culture? Please indicate your preferred choice(s), giving reasons for the decision

1.2 CULTURAL DIFFERENCES

Hofstede's Cultural Dimensions Theory

The Main Idea

"Many national differences in work-related values, beliefs, norms, and self-descriptions, as well as many societal variables, could be largely explained in terms of their statistical and conceptual associations with major dimensions of national culture"

Background

Originated from the analysis of 116,000 survey questionnaires administered to employees of the IBM corporation in 72 countries. And four major dimensions of national culture sated as below

- Uncertainty avoidance
- Power distance
- Individualism/Collectivism
- Masculinity/Femininity

In 1991 a fifth dimension "long-term/short-term orientation" was introduced which resulted from Hofstede's collaboration with Michael Bond.

In 2009 with the studies of Minkov; a sixth dimension "**indulgence vs restraint**" was found which had no equivalent in Hofstede's five-dimensional model.

1. Uncertainty Avoidance

- Is the extent to which people feel threatened by uncertainty and ambiguity and try to avoid these situations.
- In cultures of strong uncertainty avoidance, there is a need for rules and formality to structure life.

• People with strong uncertainty avoidance are less open to change and innovation than people of low uncertainty avoidance cultures.

| Weak Uncertainty Avoidance | Strong Uncertainty Avoidance |
|--|---|
| The uncertainty inherent in life is accepted and | The uncertainty inherent in life is felt as a |
| each day is taken as it comes | continuous threat that must be fought |
| Ease, lower stress, self-control, low anxiety | Higher stress, emotionality, anxiety, neuroticism |
| Tolerance of deviant persons and ideas: what is different is curious | Intolerance of deviant persons and ideas: what is different is dangerous |
| Comfortable with ambiguity and chaos | Need for clarity and structure |
| Teachers may say 'I don't know' | Teachers supposed to have all the answers |
| Changing jobs no problem | Staying in jobs even if disliked |
| Dislike of rules — written or unwritten | Emotional need for rules — even if not obeyed |
| In politics, citizens feel and are seen as competent towards authorities | In politics, citizens feel and are seen as incompetent towards authorities |
| In religion, philosophy and science: relativism and empiricism | In religion, philosophy and science: belief in ultimate truths and grand theories |

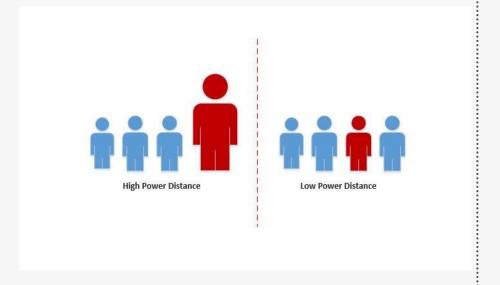

2. Power Distance

"The extent to which less powerful members of a society accept and expect that power is distributed unequally".

- In large power distance cultures, everyone has his or her rightful place in a social hierarchy.
- One's social status must be clear so that others can show proper respect.

| Small Power Distance | Large Power Distance |
|---|--|
| Use of power should be legitimate and is subject to criteria of good and evil | Power is a basic fact of society antedating good or evil: its legitimacy is irrelevant |
| Parents treat children as equals | Parents teach children obedience |
| Older people are neither respected nor feared | Older people are both respected and feared |
| Student-centered education | Teacher-centered education |
| Hierarchy means inequality of roles, established for convenience | Hierarchy means existential inequality |
| Subordinates expect to be consulted | Subordinates expect to be told what to do |
| Pluralist governments based on majority vote and changed peacefully | Autocratic governments based on co-optation and changed by revolution |
| Corruption rare; scandals end political careers | Corruption frequent; scandals are covered up |
| Income distribution in society rather even | Income distribution in society very uneven |
| Religions stressing equality of believers | Religions with a hierarchy of priests |

3. Individualism/Collectivism

Individualism is the extent to which people feel independent, as opposed to being interdependent as members of larger wholes.

Individualistic cultures

- One's identity is in the person. People are "I"-conscious, and self-actualization is important.
- are universalistic, assuming their values are valid for the whole world.
- are also low-context communication cultures with explicit verbal communication.

Collectivistic cultures

- People are "we"-conscious.
- Their identity is based on the social system to which they belong, and preserving harmony and avoiding loss of face are important.
- are high-context communication cultures, with an indirect style of communication

4. Masculinity/Femininity

Masculine society

- The dominant values are achievement and success
- performance and achievement are highly valued; and achievement must be demonstrated so status brands or products such as jewelry are important to show one's success.
- household work is less shared between husband and wife
- male and female roles are differentiated

Feminine society

- The dominant values are caring for others and quality of life.
- male and female roles overlap
- household work is shared between husband and wife, men also do more household shopping

| Femininity | Masculinity |
|---|---|
| Minimum emotional and social role differentiation between the genders | Maximum emotional and social role differentiation between the genders |
| Men and women should be modest and caring | Men should be and women may be assertive and ambitious |
| Balance between family and work | Work prevails over family |
| Sympathy for the weak | Admiration for the strong |
| Both fathers and mothers deal with facts and feelings | Fathers deal with facts, mothers with feelings |
| Both boys and girls may cry but neither should fight | Girls cry, boys don't; boys should fight back, girls shouldn't fight |
| Mothers decide on number of children | Fathers decide on family size |
| Many women in elected political positions | Few women in elected political positions |
| Religion focuses on fellow human beings | Religion focuses on God or gods |
| Matter-of-fact attitudes about sexuality; sex is a way of relating | Moralistic attitudes about sexuality; sex is a way of performing |

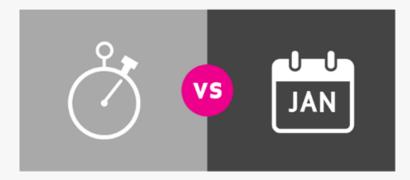

5. Long-term/Short-term Orientation

Related to the choice of focus for people's efforts: the future or the present and past.

- In a long-time-oriented culture, the basic notion about the world is that it is in flux, and preparing for the future is always needed.
- In a short-time-oriented culture, the world is essentially as it was created, so that the past provides a moral compass, and adhering to it is morally good.

| Short-Term Orientation | Long-Term Orientation |
|---|---|
| Most important events in life occurred in the past or | |
| take place now | Most important events in life will occur in the future |
| Good person is always the same | A good person adapts to the circumstances |
| There are universal guidelines about what is good and | |
| evil | What is good and evil depends upon the circumstances |
| Traditions are sacrosanct | Traditions are adaptable to changed circumstances |
| Family life guided by imperatives | Family life guided by shared tasks |
| Supposed to be proud of one's country | Trying to learn from other countries |
| Service to others is an important goal | Thrift and perseverance are important goals |
| Social spending and consumption | Large savings quote, funds available for investment |
| | Students attribute success to effort and failure to lack of |
| Students attribute success and failure to luck | effort |
| Slow or no economic growth of poor countries | Fast economic growth of countries up till a level of prosperity |

6. Indulgence/Restraint

Related to the gratification versus control of basic human desires related to enjoying life.

- In an indulgent culture, it is good to be free. Doing what your impulses want you to do, is good. Friends are important and life makes sense.
- In a restrained culture, the feeling is that life is hard, and duty, not freedom, is the normal state of being

| Indulgence | Restrained |
|---|--|
| Higher percentage of people declaring themselves very happy | Fewer very happy people |
| A perception of personal life control | helplessness: what happens to me is not my own doing |
| Freedom of speech seen as important | Freedom of speech is not a primary concern |
| Higher importance of leisure | Lower importance of leisure |
| More likely to remember positive emotions | Less likely to remember positive emotions |
| In countries with educated populations, higher birthrates | In countries with educated populations, lower birthrates |
| More people actively involved in sports | Fewer people actively involved in sports |
| In countries with enough food, higher percentages of obese people | In countries with enough food, fewer obese people |
| In wealthy countries, lenient sexual norms | In wealthy countries, stricter sexual norms |
| Maintaining order in the nation is not given a high priority | Higher number of police officers per 100,000 population |

1.3 CROSS-CULTURAL COMMUNICATION

Hall's Theory

HALL'S Cross-Cultural Theory

Hall differentiates cultures on the basis of their predominant mode of communication

- high-context
- low-context

"All cultures contain both characteristics of high-context and low-context, most can be placed along a scale showing their ranking on this particular continuum. And within each culture, one orientation seems to dominate"

High Context Cultures

- Is typical of collectivist cultures, communication style is more implicit and indirect
- Most of the information is not expressed directly through words, their body languages are all of great importance to get the whole meaning.
- People are deeply involved with each other. A structure of social hierarchy exists, and individual inner emotions are kept under strong self-control.
- As a result, information is widely shared through simple messages with deep meaning

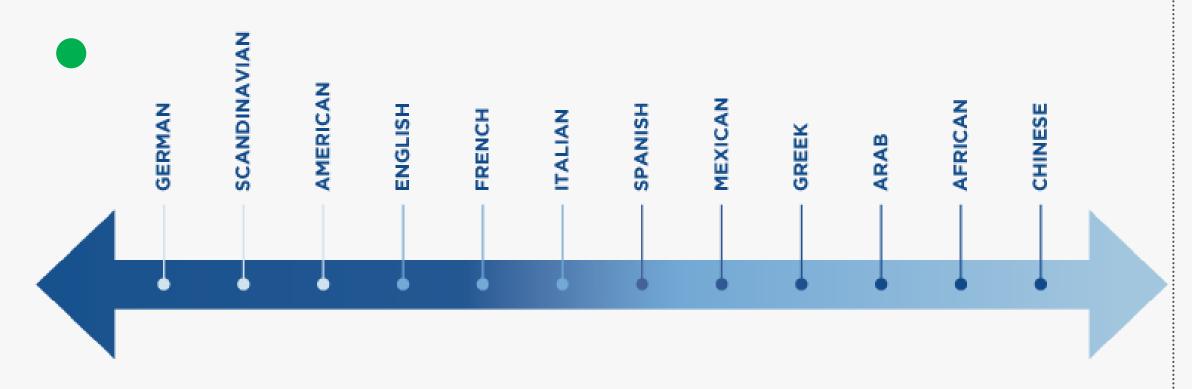

Low Context Cultures

- Is typical of individualist cultures
- The communication between people is more explicit, direct and nonpersonal
- People are highly individualized, and there is relatively little involvement with others
- Very little social hierarchy or society imposing on the individuals' lives
- In most situations, they will speak out their opinions, needs and feelings in a straight way

LOW - CONTEXT CULTURES

HIGH — CONTEXT CULTURES

Confrontation

| High context | Low context |
|---|--|
| People tend to personalize their disagreement with others | |
| To show one's disagreement and anger in public is tantamount to admitting loss of control and face, because what is being said is taken personally which may have an influence on interpersonal relationships | This kind of repression is totally unreasonable Everyone has their own rights to express opinions, and this explicit criticism has nothing to do with their interpersonal relationships |
| they will keep their emotions inside or just remain silence to avoid trouble | |
| In this way, they can maintain social harmony and intimate bonds with each other | |

Interpersonal Relationship

| High context | Low context |
|--|---|
| Is a network in which anyone can be connected to another in some way | The relationship between people is much more flexible |
| The bonds between people are relatively stable and last for a long time | Relationships begin and end quickly. |
| Things get done by relationships with people | They like to follow specific rules to get things done instead of depending on the relationships |
| Make greater distinction between insiders and outsiders. They can count on their in-groups to look after them. | People belong to different groups simultaneously and there is a vague demarcation line between two different groups |

Communication

| High context | Low context |
|--|---|
| message is less transmitted through verbal codes such as words, sentences etc., nonverbal elements—voice tone, facial expressions, gestures, and eye movements should also be taken into consideration | the mass of the information is vested in the explicit code, that is, in form of words, sentences, and grammar |
| seen as an art form—a way of engaging someone | seen as a way of exchanging information |
| People focus on relationship-building as well as information-exchanging | to say, it is what is said that matters, but not how it is said and not the environment within which it is said |

Concept of Time

| High context | Low context |
|---|--|
| High-context cultures are polychromic | Low-context cultures are monochromic |
| People treat time as a constitution of points | People treat time as a straight line |
| During a certain period, they can do several things simultaneously, so they have been used to tackling something in the process of other activities | One can concentrate only on one thing during a period of time |
| The result is which matters most, whether they are concentrated or not in the process is not taken into consideration as long as the result is satisfactory | They are inclined to make detailed schedules about what they are going to do; efficiency is the most significant to them |

Thank you for the Attention. Questions?
